Protection for hospital stays when a sickness or injury occurs

Supplemental Health and Hospital Indemnity Insurance from Allstate Benefits*

Life is unpredictable. Without any warning, an illness or injury can lead to a hospital confinement and medical procedures and/or visits, which may mean costly out-of-pocket expenses.

Expenses associated with a hospital stay can be financially difficult if money is tight and you are not prepared. But having the right coverage in place before you experience a sickness or injury can help eliminate your financial concerns and provide support at a time when it is needed most. We offer a solution to help you protect your income and empower you to seek treatment.

Here's How It Works

Our Supplemental Health Options insurance pays a cash benefit for hospital confinements. This benefit is payable directly to you and can help keep you from withdrawing money from your personal bank account or your Health Savings Account (HSA) for hospital-related expenses. Protecting your finances if faced with an unexpected illness is extremely important, as is seeking the necessary treatment when you need it. This is especially true since statistics show the average hospital stay is approximately 5 days³ and just over \$5,000 per day², which can add up quickly. These facts make it increasingly important to not only protect your finances if faced with an unexpected illness, but also to empower yourself to seek the necessary treatment.

Meeting Your Needs

- Includes benefits for hospitalization, surgery, outpatient, nursing, transportation, plus additional benefits can be added to enhance your coverage
- Coverage available for spouse and child(ren)
- Benefits paid directly to you unless assigned elsewhere, and paid regardless of any other coverage you may have

With Allstate Benefits, you can feel assured that you have the protection you need if faced with a hospitalization. **Practical benefits for everyday living.SM**

Meet Tommy

Tommy's parents are like most parents; they worry about the health and well-being of their family. They know that as Tommy grows, he will become more active and may be hospitalized due to a sickness or injury. Most importantly, they worry about how they will pay for it.

Here is what weighs heavily on their minds:

- Major medical only pays a portion of the expenses associated with hospital stays
- They have copays they are responsible for until they meet their deductible
- If they miss work due to Tommy having a hospital stay, they must cover their bills, rent/mortgage, groceries and education expenses
- If the right treatment is not available locally, they will have to travel to get the treatment he needs

Tommy's story of sickness and a hospital stay turned into a happy ending, because his parents had supplemental Health Insurance to help with expenses.

CHOOSE

Tommy's mother chooses benefits to help protect herself and her family members, should they suffer an illness or injury that requires a hospital stay.

USE

Tommy was sick and vomiting, had a loss of appetite and a fever, and complained about a pain in his side. He was also unable to get out of bed.

Here's Tommy's treatment path:

- Taken by ambulance to the emergency room
- Examined by a physician
- Multiple tests were performed
- Admitted for a two-day hospital stay
- Underwent emergency appendectomy surgery
- Visited by his doctor and released
- Recovered from surgery in 5 weeks
- Seen by the doctor during a follow-up visit

Tommy's mother went online after Tommy's hospital stay to file a claim. The cash benefits were direct deposited into her bank account.

Tommy is fully recovered and back to normal.

CLAIM

Tommy's hospital stay claim paid cash benefits for the following:

Ambulance
Initial Hospitalization
Daily Hospital Confinement
Surgery
Anesthesia
