Introduction

For the credentialing of faculty, St. Petersburg College must comply with the standards set forth by its accrediting organization, the Commission on Colleges of the Southern Association of Colleges and Schools. The *Teaching Disciplines and Faculty Credentialing Guidelines* manual complies with the standards for faculty identified in:

The Principles of Accreditation: Foundations for Quality Enhancement
Published by the Southern Association of Colleges and Schools, Commission on Colleges, 2012.

Comprehensive Standards: 3.7

3.7 Faculty

3.7.1 The institution employs competent faculty members qualified to accomplish the mission and goals of the institution. When determining acceptable qualifications of its faculty, an institution gives primary consideration to the highest earned degree in the discipline. The institution also considers competence, effectiveness, and capacity, including, as appropriate, undergraduate and graduate degrees, related work experiences in the field, professional licensure and certifications, honors and awards, continuous documented excellence in teaching, or other demonstrated competencies and achievements that contribute to effective teaching and student learning outcomes. For all cases, the institution is responsible for justifying and documenting the qualifications of its faculty.

Credentialing Guidelines

(a) Faculty teaching general education courses* at the undergraduate level: Doctor's or Master's degree in the teaching discipline or Master's degree with a concentration in the teaching discipline (a minimum of 18 graduate semester hours in the teaching discipline).

(b) Faculty teaching Associate degree courses designed for transfer to a Baccalaureate degree: Doctor's or Master's degree in the teaching discipline or Master's degree with a concentration in the teaching discipline (a minimum of 18 graduate semester hours in the teaching discipline).

(c) Faculty teaching Baccalaureate courses: Doctor's or Master's degree in the teaching discipline or Master's degree with a concentration in the teaching discipline (minimum of 18 graduate semester hours in the teaching discipline). At least 25 percent of the discipline course hours in each undergraduate major are taught by faculty members holding the terminal degree--usually the earned Doctorate--in the discipline.

*General Education Courses include: Communications; Humanities; Fine Arts; Mathematics; Natural Sciences; Social and Behavioral Sciences.

Guidelines

The *Teaching Disciplines and Faculty Credentialing Guidelines* manual is intended to assist Deans and all readers with the process of credentialing faculty members to teach at St. Petersburg College. Both full-time and part-time (adjunct) faculty teaching credit courses are required to meet these credentialing standards. This manual identifies the minimum academic and work experience credentials needed to teach SPC courses listed in each teaching discipline.

The first few pages describe the process of credentialing faculty and list important considerations when making credentialing decisions. The main part of the manual is devoted to listing each of the Teaching Disciplines with complete identification of:

- The Teaching Discipline reference number
- The Teaching Discipline name
- The level of the Teaching Discipline (all degree level courses are transfer courses)
- The SPC course(s) identified with the Teaching Discipline
- The MINIMUM faculty preparation requirements

Academic and Work Experience

- Credentialing notations which SPC considers for that specific Teaching Discipline

The requirements are listed in as much detail as possible to guide the Dean or reviewer in making appropriate credentialing decisions. All SPC credit courses have been assigned to only one teaching disciplines.

The latter part of the manual contains links to SACS and other valuable credentialing resources.

When questions arise about the interpretation of the guidelines, the reviewer should contact the Office of the Senior Vice President of Instruction and Academic Programs. That Office will make final rulings on credentialing.

Notation: For the credentialing of faculty, St. Petersburg College must also comply with the Board of Trustees Rule 6Hx23-2.022, Certification of Instructional, Administrative and Professional Personnel. Please refer to Appendix.

Process

The following information briefly describes the credentialing process and credentialing considerations for new full-time or part-time faculty hires.

I. SPC Faculty Hiring and SPC Faculty Credentialing Form

An online St. Petersburg College (SPC) Faculty Credentialing Request must be completed for all faculty candidates. All supporting documentation must be attached to the request. If a faculty applicant will be assigned to more than one teaching discipline (subject area), a separate SPC Faculty Credentialing Request must be completed for each teaching discipline (e.g., Mathematics and Physics; Biology and Oceanography; English and ESL; Management and Computer Science, etc.). Upon submission, each request is routed to the appropriate Dean for the academic area; the Dean must approve the candidate before the request is forwarded to the Senior Vice President of Instruction and Academic Programs. Any hard copy supporting documentation must be sent to the Human Resources department.

For full-time faculty candidates, the Dean must have the SPC Faculty Credentialing Request approved by the Senior Vice President of Instruction and Academic Programs *before an interview with the President will be scheduled*.

Faculty candidates coming from an SPC A&P, Career Staff or OPS position must complete an Instructional Staff Employment Application and the SPC Faculty Credentialing Request must be completed by the appropriate Dean.

A faculty applicant must provide copies of official transcripts for all undergraduate and graduate degrees identified on the employment application. Transcript copies must also be provided for all other non-degree undergraduate or graduate coursework taken and listed on the employment application, if coursework is to be counted in the credentialing analysis.

A faculty applicant who possesses degree(s) from institutions outside of the U.S. must submit an appropriate *course-by-course* foreign credential evaluation. This information must be presented to the Dean before the applicant can be considered for employment. The foreign credentialing organization must be one identified in the current listing by the National Association of Credential Evaluation Services: www.naces.org/members.htm.

A faculty applicant must provide copies of appropriate licensure/certification verifications if required by the teaching discipline.

A faculty applicant must demonstrate satisfactory oral and written communication skills and this demonstration must be confirmed by the Dean.

A faculty applicant must be able to demonstrate the use of technology in the classroom and must be able to use the technology required for the course.

If a *current* faculty member has already been credentialed to teach in one teaching discipline (subject area), but the

Dean or a different Dean decides to assign that faculty member to an additional teaching discipline (subject area), a separate SPC Faculty Credentialing-Request must be completed by the Dean and approved by the Senior Vice President of Instruction and Academic Programs.

Credit hours listed on the SPC Faculty Credentialing Request will be identified as *semester* hours—not quarter hours, clock hours, etc.

Course work submitted by the faculty applicant as graduate credit must be clearly designated on the transcript of the granting institution as part of a graduate program, or formally validated by the granting institution as graduate-level study. Official documentation must be provided by the granting institution and attached to the SPC Faculty Credentialing Request.

Course work listed on the SPC Faculty Credentialing Request, not taken in the graduate department of the subject to be taught, must include catalog course descriptions and/or documentation from the granting institution that the course(s) contain similar content to the SPC course to be taught. This information should be attached to the SPC Faculty Credentialing Request.

A detailed explanation of any directed study, seminar, thesis, internship, research and/or dissertation credits counted towards the required 18 graduate semester hours must be identified on or attached to the SPC Faculty Credentialing Request.

The SPC Faculty Credentialing Request must include all of the SPC disciplines for which the Dean wants to credential the faculty applicant.

A faculty applicant who does not strictly meet the SACS-COC standards (and that of SPC) may work with the Dean to submit a portfolio for review by the Senior Vice President of Instruction and Academic Programs. These procedures are detailed in Section III.

II. Transcript Review

For the purposes of preliminary faculty credentialing, transcript copies will be accepted. Once hired, the faculty applicant must obtain and have sent to the Office of Human Resources, official copies of transcripts for all undergraduate and graduate degrees and coursework identified on the employment application. Official transcripts must also be provided for all other non-degree undergraduate or graduate coursework taken and listed on the employment application, if coursework is to be counted in the credentialing analysis. *An official transcript is one that is sent from the sending institution directly to the receiving institution and does not pass through the hands of the student.*

Degrees or coursework which count towards credentialing must be obtained from regionally-accredited institutions.

Coursework within the degree must reflect competencies in the SPC courses to be taught.

Credentialing requirements for full-time and part-time faculty are the same.

Credentialing requirements for lecture or lab credit courses (regardless of the number of credit hours, or if the course is offered on the weekend) are the same.

One or two undergraduate courses, if taken as part of a graduate program, may be counted as part of the faculty applicant's 18 graduate semester hours credentialing total if the course content reflects the SPC course to be taught.

Graduate courses, if taken as part of an undergraduate curriculum, will NOT be counted.

In cases where it is not clear that the "related" coursework in a graduate or undergraduate degree is appropriate to the teaching assignment, it will be necessary to obtain catalog course descriptions and/or documentation from the granting institution. In some cases, a complete portfolio may be required.

Coursework to be counted as part of the faculty applicant's 18 graduate semester hours must have a letter grade of "C" or higher.

The transcript(s) must evidence full degree completion.

The degree title(s) written on the SPC Faculty Credentialing Request must be identical to what appears on the transcript(s).

The course title(s) written on the SPC Faculty Credentialing Request must be identical to what appears on the transcript.

III. Faculty Portfolios

A faculty applicant who does not strictly meet the SACS-COC standards (and that of SPC) may work with the Dean to submit a portfolio for review by the Senior Vice President of Instruction and Academic Programs. The portfolio should contain the following information:

1. Resume/CV identifying related work experience(s) and teaching experience(s) in the Teaching Discipline(s).
2. Professional certification(s) in the Teaching Discipline(s).
3. Professional licensure(s) in the Teaching Discipline(s).
4. Recognition in journals, online sources, textbooks, publications, and/or programs in the teaching discipline.
5. Professional Presentations
6. Honors or awards directly related to the discipline.
7. Professional exhibitions or shows at reputable galleries and theaters.
8. Continued Professional Development in the discipline.
9. Other evidence of continuous excellence in teaching documented by a third party.

Note: Items 2-9 are usually listed on a current resume/CV and do not need to be duplicated. Copies of certifications/licenses should be submitted.

If you are not certain about a faculty applicant's proper credentials, please contact the Senior Vice President's Office of Instruction and Academic Programs to obtain a preliminary review before the interview/hiring stage.
